Anything

Figbruary is a fictional month created by combining Figma + February where you can experiment and design things daily to push the limits.

For every 24 hour day within this 696 hour timespan of the month, we have prepared a prompt with instructions for you to design and create.

PS. - You don't have to follow the prompt exactly. Or even at all.

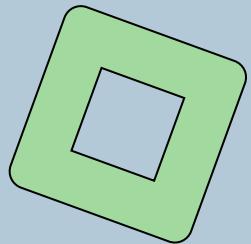

Share your work and tag it with **#figbruary** and **#figbruary2024**
